16 Week

STANDARD INTERMEDIATE TRIATHLON TRAINING PLAN

## Key Notes

Please find below a 16 week intermediate standard/Olympic distance triathlon training plan to help you prepare for your event.

- ▶ This 16 week training plan is designed to get an intermediate triathlete through a standard distance triathlon in a good time. It is not a complex or hugely time consuming programme, however as you might expect in order to improve performance, sessions are longer and tougher than a beginner program.
- ▶ In order to be able complete the training you should have a reasonable level of fitness at the start of the training. A pre-requisite would be that you can swim 1500 m continuously, you can cycle for 120 mins and run for 60 mins.
- ▶ The training sessions can be completed in a number of locations. The swim sessions are mostly designed for a pool, with open water sessions towards the latter half of the program. The bike sessions are designed so the midweek ones can be done on a turbo or gym/watt bike as this might fit in with your working week. However were possible it's recommended to be outside when you can. The same goes for the running sessions. We would strongly advise that you do spend as much time as possible training outdoors so that you get time training in similar conditions to those that you will be racing in.
- ▶ While the majority of swim sessions are pool based for the ease and practicality of training to a plan, as well as access for most people. Open water skills are important for making performance gains. The more efficient you can site and adapt your stroke to open water, the faster you'll be.
- ▶ The intensity of the training in this programme is to be executed using the RPE (Rate of Perceived Exertion) scale, this allows the athlete to work to their limits with specific barriers. We would advise that if this kind of training is new to you that you are cautious to begin with until you can understand how your body reacts to the training. The full RPE scale is at the back of the programme. If you are using heart rate or power meters, you should also relate these to how you feel. While technology like this is a fantastic tool for training and racing to a plan, ultimately your body can be the best source of information on how hard you can work. So, use all of the information available to you.
- ▶ We would strongly advise that as you get closer to the race day you ensure that you train using the exact equipment that you intend to use on race day, the same clothes, the same wetsuit, the same bike and trainers. You should not turn up on race day with brand new equipment to use.
- ▶ From time to time your busy lives will get in the way, we recommend that you don't make up the missed sessions simply resume your plan on the current day. Similarly the particular days the various sessions are laid out on are an example of a suitable/ideal way to spread them out. However you may change them to suit your own timings or around existing club sessions that you may already attend. So long as you allow sufficient recovery between longer sessions, or the same discipline.
- ▶ **At the back of this training plan is the 'Appendix' where you will find the RPE scale, swim sessions and strength and conditioning programs that are referenced throughout the plan.**

WEEK 1								GOALS
DAY	MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY	SATURDAY	SUNDAY	Building a routine of allocating time to train  Letting your muscles start to work into focused training  Adding skill/drill work for technique improvement  Embarking on strength training to improve strength endurance
SESSION	Swim	Bike	Run	Rest	Strength & Run	Swim	Bike	
DISTANCE	2.5 km	20 km	10 km		60 min/5 km	2.5 km	30 km	
INTENSITY	Drills/Intervals	Mixed effort	Steady state		Negative split	Drills/Intervals	“Just Ride”	
SESSION DETAILS	Session #7	Turbo/Watt bike: 5 km @RPE 4-5 5 km @RPE 5-6 5 km @RPE 7-8 5 km @RPE 6-7  If you're doing this session outdoors on a loop then break it down into sections where you can have set effort and rest periods.	"just run", @RPE 5-6 trying to maintain steady pace; note pace/speed.  Use this as a guide to your current aerobic pace, which you can work of for future sessions in this plan.		Strength: Program 1b  Run: @RPE-6/7 Try and run each km a few seconds faster than the previous.	Swim: Session #8	Aim to ride at a comfortable pace around RPE 5-7  Over-gearing could be used to strengthen legs on flatter sections, focusing on pedal technique.	
KEY FOCUS	Body position, comfort in the water	Getting the legs moving, set a base speed/effort level to work from in later sessions.	Getting into running, establishing a baseline		Starting strength program. Finding a steady pace	Body position, arm position when beginning stroke, Holding a consistent pace	Miles in the legs. Try “over gearing” for strength work; (riding one gear higher)	
NOTES	Learning to pace yourself and use different speeds it key to maintaining good race pace. Shorter efforts in the pool allow you to focus on technique.	Your bike needs to fit you; if you're stepping up your game look at getting a more aero bike fit or consider adding tri-bars if you've not already.	Make a note of your pace/speed during these sessions as a reference of your speed for a given effort. This is a sub maximal effort and should feel comfortable.		First strength session of the program; focus on technique and execution of the movements	Learning to hold your pace is important. By shortening your sets as the session goes on you allow more rest and time to refocus on your stroke.	Time in the saddle will allow you to get used to your bike, and if you're thinking about changing the positions or using aero-bars then the more you can get used to them the better.	

**WEEKLY DISTANCE: 70 KM**

WEEK 2								GOALS
DAY	MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY	SATURDAY	SUNDAY	Building on the first week slightly, but not too much, so as to allow recovery.  Pace judgement and learning times for completing distances etc.  Getting to know the weights needed for each exercise on the strength program  Taking note of your pace for a given distance and intensity will make setting pace in later session more accurate
<b>SESSION</b>	<b>Strength &amp; Swim</b>	<b>Bike</b>	<b>Run</b>	<b>Rest</b>	<b>Strength &amp; Swim</b>	<b>Run</b>	<b>Bike</b>	
<b>DURATION</b>	60 min/2.5 km	25 km	5 km		60 min/2 km	8.5 km	40 km	
<b>INTENSITY</b>	Drills/Intervals	Intervals	Negative		Drills/Int	Hills	"just ride"	
<b>SESSION DETAILS</b>	Strength: Program 1a  Swim: Session #7	3 km warm up @RPE 4-5  2 km @RPE 8 3 km @RPE 5 4 x through  2 km warm down @RPE 4	Run: Run at a steady but sustainable Threshold pace that is you maximum effort for 5 km. run the first 2.5 km @RPE 6-7, then run the second half around RPE 7-8		Strength: Program 1b  Swim: Session #4	Head out for a steady run around RPE 5-7.  Aim to include some undulation in your route, holding the effort level on the hills, both up and down. Use the downhill to work hard on foot strike and stabilisation.	Head out for a ride at an RPE 5-8, some mixed efforts, taking in hills as they happen and making use of any flat safe areas to put a little power down.	
<b>KEY FOCUS</b>	Body position and kicking efficiency	Working towards a threshold pace, setting a pace for later sessions	Pace control and good form.		Strength: Skill of movement. Swim: Technique & endurance	Maintaining pace even on undulating terrain.	Working at threshold and below	<b>WEEKLY DISTANCE: 83 KM</b>
<b>NOTES</b>	Kicking work will aid body position and rotation through the hips which will propel a better stroke. Shorter efforts will introduce speed work	Session may be done on indoor trainers where practical, however don't ignore value of getting out on the bike	Maintain form even when working hard. This will be important for efficient come race day.		Strength training is valuable for making you more "robust", but exercises must be performed correctly; focus on technique. Run should be short and sharp	You may utilise sessions like these as off-road sessions. The mixed surfaces will challenge you more and may also be a nice break from tarmac.	Learning to vary the pace on the bike will keep training interesting, but will also teach pace judgment and your ability to overtake cleanly	

WEEK 3								GOALS
DAY	MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY	SATURDAY	SUNDAY	Consistency; keep the routine going. Modify session timings to fit your schedule if need be or if you find one session fatigues you for another too much
SESSION	Swim	Bike	Swim & Run	Rest	Strength & Run	Swim	Brick	
DURATION	2.5 km	20 km	2 km/10 km		45-60 min/5 km	1.5 km	15 km/3 km	Your first brick session is a fairly short session, so you choose to work hard to test your speed. This will give you some time to compare later in the program.
INTENSITY	Drills/Intervals	Mixed effort	Intervals/Steady		Fartlek	Intervals	Mixed	
SESSION DETAILS	Swim: Session: #8	5 km @RPE 5 5 km @RPE 6-7 5 km @RPE 5-6 5 km @RPE 7-8  Use the gearing to keep your cadence between 85-95	Swim: Session #5  Run: "just run" – steady aerobic pace RPE @6-7 Each km should be within 5-10 seconds (depending on the consistency of your route)		Strength: Program 1b  Run: Fartlek; steady run with random intervals based on cues on your surrounding or route; e.g. sprinting between lampposts, or up short hills.	Swim: Session #2	Bike @RPE 5-6 steady effort  Run @RPE 6-7 steady effort  Moderate effort bike with harder run; running on tired legs	
KEY FOCUS	Leg & head position in the water. Pace & speed.	Pacing & cadence, working at aerobic & threshold levels.	Run posture/form and ability to hold pace and technique.		Ability to vary effort, but return to a steady pace.	Increasing pace on shorter sets.	Getting used to running hard off the bike	WEEKLY DISTANCE: 59 KM
NOTES	Continuing with body positioning and kicking drills, moving into pacing with short sets with some sprint work.	Pace control; having the ability to switch pace based on perceived effort will be a key skill in pacing in a race	The focus of this run should be feeling comfortable with the distance, focusing on your posture and run form, finishing feeling strong. Try to run without checking your activity tracker, purely on feel to see how well you can pace.		This can be a good session to do with a friend, you can take turns to call the efforts and make it fun.	As you do shorter/faster efforts it can be easy to lose technique focus. So try to keep your form, even when working hard. Try to replicate time/speed on efforts of the same length	Use brick session to practice how you lay out your kit and fine tune your transition speed. This is free time and somewhere you can make up a lot of time in a race.	

WEEK 4								GOALS
DAY	MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY	SATURDAY	SUNDAY	<p>One month in you'll be starting to feel improvements in fitness from training.</p> <p>Stick to the increases in distances as best you can, and where it fits.</p> <p>By now you should be getting more familiar with judging your effort on the RPE scale. And, if you're also using HR/Cadence meters you can relate this to a working HR for your Bike and Run.</p> <p>Improvements in speed are seen in the ability to repeat faster efforts consistently, not just go faster on one or two efforts.</p>
<b>SESSION</b>	<b>Swim</b>	<b>Bike</b>	<b>Strength &amp; Run</b>	<b>Rest</b>	<b>Strength &amp; Swim</b>	<b>Run</b>	<b>Bike</b>	
<b>DURATION</b>	2.5 km	30 km	60 min/8.5 km		60 min/2 km	5 km	50 km	
<b>INTENSITY</b>	Drills/Intervals	Intervals	Intervals/Steady		Tempo	Track	Hills	
<b>SESSION DETAILS</b>	Swim: Session #7	5 km @RPE 5 5 km @RPE 6 5 km @RPE 7 5 km @RPE 8 5 km @RPE 7 5 km @RPE 6  Use the gearing to keep your cadence between 85-95	Strength: Program 1a  Run: RPE 5-6		Strength: Program 1b  Swim: Session #6	Run: Session #1	Steady state ride with some hills included. Maintain steady cadence and rhythm. Pace judgement on hills.	
<b>KEY FOCUS</b>	Body position, rotation through the hips. Fist drill for arm position in water	Pace judgement and working at higher efforts	Run: Keep it light so you can hold a steady pace throughout		Maintaining hip rotation when using Pull Buoy	Pace replication & speed work	Pace judgement on hills	
<b>NOTES</b>	Stroke set up is important in swim efficiency. Focusing on the forearm placement as part of a 'paddle' will give you great drive through the water.	This may be performed on a turbo or outside, whichever is convenient	Steady effort at a below max pace, focusing on holding form and keeping each km the same speed. If your form suffers then slow the pace.		The strength program should be getting easier and you should be increasing your weights/times of each exercise.	Track sessions a great for pacing, and working on speed development. Sets of the same distance should be completed in the same times. Monitor progress over time	Judging pace on hills is important for pacing a good bike split. Good descending skills will help you make the most of your speed too.	
								<b>WEEKLY DISTANCE: 98 KM</b>

Week 5								GOALS
DAY	MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY	SATURDAY	SUNDAY	Pace replication on swim & run sets of similar distance. This will give you an idea of your ability to judge.
SESSION	Swim	Bike	Swim & Run	Rest	Strength & Run	Swim	Brick	
DURATION	2.5 km	25 km	2.5 km/7.5 km		60 min/5 km	2 km	20 km/5 km	If you're starting to find session easier it means your fitness is improving.
INTENSITY	Drills/Intervals	Intervals	Intervals/Steady		Track	Drills/int.	Negative Split	
SESSION DETAILS	Swim: Session #8	5 km @RPE 5 5 km @RPE 7 5 km @RPE 6 5 km @RPE 8 5 km @RPE 7  Use the gearing to keep your cadence between 85-95.  If outside, find a route, or looped circuit with fairly uninterrupted roads & minimal undulation.	Swim: Session #7  Run: Maintain just below target race pace by 5-10 sec/km @RPE 5-6		Strength: Program 1a  Run: Session #1	Swim: Session #4	Ride the first 10 km @RPE 5, then the second 10 km @RPE 7  Run off the bike @RPE 6 for 2.5 km then finish @RPE 8	Stick to strength work as this will play a large part in efficiency and performance later on.
KEY FOCUS	Body position, rotation through the hips	Pace judgement and working at higher efforts	Run: Focus on form & pacing. Use tracker to keep pace the same.		Aim to match last week's efforts, not beat. Consistency	Shorter sets; faster pacing. Hold technique even with speed.	Pace control and running well on tired legs.	<b>WEEKLY DISTANCE: 69.5 KM</b>
NOTES	Your kicking should be already feeling better, but still keep body position in mind and legs high in the water. Think about rotation through the hips.	This may be performed on a turbo or outside, whichever is convenient	Steady effort at a below max pace, focusing on holding form and keeping each km the same speed. It's normal for HR to increase over time even when effort is the same.		The strength program should be getting easier and you should be increasing your weights/times of each exercise. The target of the run is to be consistent	Shorter sets allow you to work more on speed in smaller more replicable blocks of distance, while the rest is short enough to still fatigue.	Set out your run kit so that you spend minimum time between your bike and run	

WEEK 6								GOALS
DAY	MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY	SATURDAY	SUNDAY	By week 6 you should be more settled with the routine and moving any sessions to fit in with your day to day life.
SESSION	Strength & Swim	Bike	Run	Rest	Strength & Swim	Run	Bike	
DURATION	60 min/2.5 km	25 km	10 km		60 min/2.5 km	7.5 km	70 km	As the bike distance increases you should start to find a comfortable speed/rhythm with your peddling that will become your natural cadence. Use gears to keep you in this range.
INTENSITY	Drill/Intervals	Intervals	Steady		Intervals	Track	“Just Ride”	
SESSION DETAILS	<p>Strength: Program 1a</p> <p>Swim: Session #8</p>	<p>5 km Warm up @RPE 4-5</p> <p>1 min @RPE 5 6 min @RPE 6 1 min @RPE 7 1 min @RPE 8 1 min @RPE 9</p> <p>Repeat as many times through until you reach 23 km.</p> <p>2 km @RPE 4</p>	<p>Run: Maintain a steady (below threshold) pace of around RPE 5-6</p> <p>If you like you can do this session off-road, but not too technical. Off-road build more skill work as you're controlling on an uneven surface. Expect to be a little slower for the same effort though.</p>		<p>Strength: Program 1b</p> <p>Swim: Session #7</p>	<p>Run: Session 2</p>	<p>Head out on a route with varying terrain, aiming to keep a steady tempo.</p> <p>Use longer rides to practice pacing and getting used to a more aero position where possible; bent elbows, low on the bars/drops or aero bars if you have them.</p>	As the weekly distance increase make sure you're sleeping and eating enough to recover.
KEY FOCUS	Body position, rotation through the hips	Adjusting and holding speed & recovery from efforts	Moderate effort with sustainable form throughout		Arm placement during catch phase & pulling with hand and forearm as one	Replicating pace over similar distance. Increasing pace over 800's	Utilising the best position or gear for the type of road you're on	<b>WEEKLY DISTANCE: 117.5 KM</b>
NOTES	Your kicking should be already feeling better, but still keep body position in mind and legs high in the water. Think about rotation through the hips.	Remember RPE 6 is your sustainable moderate pace, then building up through to RPE 8 being your threshold pace (Race pace) with RPE 9 being unsustainable for much longer than 1 min	Remember that building run endurance is as much about maintaining run form as well as speed and distance		The strength program should be getting easier and you should be increasing your weights/times of each exercise. Swim sets should be getting easier and you should be seeing improvement	Using time splits every 200 m, look for pace consistency. Over time you'll find it easier to run a set pace at will.	Start looking at your average speed over these rides. They should be below your expected race pace (because of traffic, junctions etc.) but a good indication of your progress over the program.	

WEEK 7								GOALS
DAY	MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY	SATURDAY	SUNDAY	If you're considering things like elastic laces in your shoes, or perhaps running without socks to improve transition time, then practice this now to give you time to get used to it.
SESSION	Swim	Bike	Swim & Run	Rest	Strength & Run	Swim	Brick	
DURATION	60 min/2.5 km	30 km	2 km/7.5 km		60 min/5 km	2 km	25 km/5 km	Nearly half way through, you should be feeling fitter, but also make sure you're resting enough and getting suitable recovery nutrition.
INTENSITY	Kick & Intervals	Intervals	Int./Steady		Drills/Fartlek	Intervals	Tempo	
SESSION DETAILS	Swim: Session #8	5 min warm up @RPE 4  5x5 workout: 5 min @RPE 6 5 min @RPE 8  Repeat until you reach 28 km then ride easy for remaining time @RPE 4	Swim: Session #5  Run: Maintain a steady (below threshold) pace of around RPE 5-6		Strength: Program 1b  Run: Fartlek; random intervals made up on a route of your choosing. Your average pace should still be around @RPE 6 with time spent between RPE 5-9	Swim: Session #6 You may add in paddle work with the pull buoy sets if you wish. NOTE: if you notice your technique suffering with paddles as you fatigue, take a break from them.	Complete your bike/run brick in a tempo/race pace format; holding a firm but slightly below threshold pace on the bike and then running hard off the bike.  Bike @RPE 6-7 Run @RPE 8	
KEY FOCUS	Body position, rotation through the hips	Longer threshold efforts to get you used to race pace	Swim; drills & speed  Run; steady pace & good form.		Adding some fun into training but also learning to return to base pace following effort.	Shorter intervals for more speed work	Learning to run hard off a hard bike	<b>WEEKLY DISTANCE: 79 KM</b>
NOTES	Your kicking should be already feeling better, but still keep body position in mind and legs high in the water. Think about rotation through the hips. You can use fins for some of the kick length to add in a strength element	While this session may be done outside on a flat loop; it's a good one for the turbo/indoor trainer too.	Use the 1-arm drills to iron out left/right imbalance and help you breath to your weaker side. Ensure the lead arm is kept in position out in front.		Your average pace should be similar to an aerobic (RPE 6-7) run but with lots of variation in speed. This can be a good session to do with a friend, since you can take turns to call sprints, or efforts.	Make sure to continuously breath out under water, avoid holding your breath. Remember head position; eyes down. Paddles are good as they slow down your stroke and allow you to focus on technique.	Practice with gearing to find and maintain a steady cadence/rhythm so you can control your effort. Settle into a run pace quickly. Practice set up in transition so you can save valuable time	

Week 8								GOALS
DAY	MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY	SATURDAY	SUNDAY	Two months in you'll be able to maintain harder efforts for longer and more consistently.
<b>SESSION</b>	<b>Swim</b>	<b>Bike</b>	<b>Strength &amp; Run</b>	<b>Rest</b>	<b>Strength &amp; Swim</b>	<b>Run</b>	<b>Bike</b>	
<b>DURATION</b>	3 km	25 km	60 min/5 km		60 min/2.5 km	12.5 km	70 km	
<b>INTENSITY</b>	Drills/Intervals	Intervals	Track			Steady	Hills	With sessions that you're getting used to, you may add in some variation, as long as you follow the same principals, and stick to the volume.
<b>SESSION DETAILS</b>	Swim: Session #9	5 km Warm up @RPE 4-5  1 min @RPE 5 6 min @RPE 6 1 min @RPE 7 1 min @RPE 8 1 min @RPE 9  Repeat as many times through until you reach 23 km.  2 km @RPE 4  Outdoor option: 50 min as: 5 min @RPE 5 5 min @RPE 7	Strength: Program 2a  Run: Session #1		Strength: Program 2b  Swim: Session #7 You can switch out the drills with other variations; 1-arm, kicking, catch up if you prefer them, or find the more effective.	Run: Long steady run @RPE 5-6 Pace should be kept well within comfort. Focus on being able to hold pace for the whole duration of the run.	Steady state ride with some hills included. Maintain steady cadence and rhythm. Pace judgement on hills.	
<b>KEY FOCUS</b>	Holding harder efforts for longer. Shorter sprints for speed development	Adjusting and holding speed & recovery from efforts	Run: Aim to better times from last time you did this session		Speed & consistency	Run form and steady pacing.	Pace judgement on hills	<b>WEEKLY DISTANCE: 118 KM</b>
<b>NOTES</b>	When using paddles, while they are good for strength work; they also slow your cadence so that you can focus on stroke technique a little more too.	Remember RPE 6 is your sustainable moderate pace, then building up through to RPE 8 being your threshold pace (Race pace) with RPE 9 being unsustainable for much longer than 1 min	New strength program, take time to get used to the moments before you increase difficulty too much.		If you're using a swim watch or pace clock, you should be able to see improvements in your speed and your ability to hold that speed for longer.	Running for longer than you race distance will improve your endurance, and ability to hold speed over the 10 km distance.	Riding uphill increases strength, but learning to descend confidently will be valuable to safe riding and a fast time.	

WEEK 9								GOALS
DAY	MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY	SATURDAY	SUNDAY	"Time Trial" week. This is an opportunity to test how far you've come and get an idea of where you'll be setting your race target pace.  If you've not already; start thinking about hydration and fuelling for longer rides and perhaps experiment with various drinks/gels if you're planning to take them come race day.
SESSION	Swim	Bike	Swim & Run	Rest	Strength & Run	Swim	Brick	
DURATION	3 km	25 km	2.5 km/10 km		60 min/5 km	2 km	25 km/7.5 km	
INTENSITY	Drill/Pacing	TT	Drills & TT/Tempo		Track	Open Water	Negative Split	
SESSION DETAILS	Swim: Session #10  If you like you can alter the main set to allow a 1000m Time Trial to test your race pace. The resume the rest of the session as written. (keeping it to 3 km)	1 km warm up @RPE 5  Once warmed up using your pace from previous session aim to hit your threshold speed for the rest of the distance.  warm down, easy leg spin afterwards for a couple minutes.	Swim: Session #8  Run: Aim to run at your fastest sustainable pace. For 10 km  @RPE 8		Strength: Program 2a  Run: Session #1 Aim to hit the 800s at 5 sec per lap faster than the 1600, and the 400s another 3-5 seconds per lap quicker. BUT; each repeated distance must be consistent.	Swim: First open water swim of the program. You're first goal is to ensure proper wetsuit fitting, and spend some time getting used to the water which may be colder earlier in the season. Cover the distance aiming to swim smoothly, keeping a good technique.	Complete the first half of each discipline at a steady tempo, building into your race pace for the last half. RPE 6-8	
KEY FOCUS	Pace control and repeatability of each set time.	Maintaining intensity with minimal change in pace.	This is a best effort time, to check in where you current race pace lies.		Repeatable pace with minimal time checks.	Water acclimatisation, Stroke adaptation & breathing	Steady building into Threshold pace	<b>WEEKLY DISTANCE: 80 KM</b>
NOTES	If you cannot repeat the times from each set, adjust your speed. Be strict with your turn around times, either going "off" a set time or limiting yourself to 15 sec rest on shorter sets.	This should be done on a flattish route. Alternatively this may also be done on a turbo trainer, WATT bike or gym bike. The idea is to test how well you can hold a goal race pace.	This might be currently slower than where you plan to be in 6 week's time, but it will give you a rough idea of your progress and if your target time is realistic		Pacing and strength work. Improving your ability to run at higher speeds will increase your run fitness but also give your more ability to push yourself towards the later stages of a race.	Add in some sighting practice, getting better at this will pay off on race day. Practice breathing to your weaker side, in case you need to on race day.	Play with position on bars for flat & climbing. Use gears to keep your pedal cadence smooth. Learning to run a negative split out of transition will help with pacing.	

WEEK 10								GOALS
DAY	MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY	SATURDAY	SUNDAY	<p>Any new kit you're planning to use should be used in training to test it; new goggles (tinted for open water), trainers, elastic laces, bike shoes, tri suit etc. You need to make sure it all fits and works where you need it.</p> <p>Open water competency will be a massive factor in your comfort, confidence and will count come race day</p> <p>Practice getting the suit on, getting it wet (inside) in the water, warming and getting used to it quickly so that come race day it's all routine.</p> <p>Consider goggle choice for weather/lighting conditions</p>
SESSION	Strength & Swim	Bike	Run	Rest	Strength & Swim	Run	Bike	
DURATION	60 min/2.5 km	30 km	12.5 km		60 min/2 km	5.5 km	70 km	
INTENSITY	Drill/Intervals	Intervals	Intervals/Steady		Intervals	Tempo/Hills	Steady/Hills	
SESSION DETAILS	<p>Strength: Program 2a</p> <p>Swim: Session #7</p> <p>Count strokes per length as a way of keeping your technique in check; if you have to increase your strokes, you're losing efficiency, or fatiguing.</p>	<p>Incremental set:</p> <p>10 km @RPE 5 10 km @RPE 7 10 km @RPE 8-9</p> <p>Getting used to an increasing intensity which will feel like it's getting particularly hard at the end.</p> <p>If you're doing this set outside where the ground naturally varies, then try to make your average HR higher by 5-10 beats every 10 km.</p>	<p>Run: Sub-max effort steady run. @RPE 6</p> <p>Aim to keep a comfortable good run form with minimal changes in HR. You can do this as an off-road run too, with minimal undulation.</p>		<p>Strength: Program 2b</p> <p>Swim: Session #6</p>	<p>Run: @RPE 6-8</p> <p>Short and fast run. You can either choose to do a flatter tempo run, or you can do a hill session; either running a hilly course, or doing multiple reps of one hill.</p>	<p>Head out on a route, aiming to keep your average work effort: @RPE 6</p> <p>If you like you can plan some hills into your route for some harder work intervals.</p>	
KEY FOCUS	Pace replication between sets of same distance.	Pace control, knowing what's easy and what's hard.	Holding a steady pace, finishing as strong as you started.		Continue to work hard on strength work.	Good form when running hard.	Pacing & running hard off the bike	
NOTES	When breathing aim to keep one eye in the water, and keep your lead hand out in front until your recovery arm is on the way forward. Counting stroke per length is a good way of spotting efficiency and fatigue.	While this session may be done outside on a flat loop; it's a good one for the turbo/indoor trainer too. if you've a 10km training loop you can aim to take off a minute+ each time.	Ensure you warm up prior to running; foam rolling & mobility work to allow better run form.		With a higher volume bike week, this lower volume swim will allow you to work hard without over fatiguing.	With the rest of this week's sessions being longer distance, this will be a good short, sharp hard session.	Good pacing on hills is important to maintain optimal race pace, too easy and you lose time, to hard and you'll be slower on the flats.	

**WEEKLY DISTANCE: 122.5 KM**

WEEK 11								GOALS
DAY	MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY	SATURDAY	SUNDAY	As the volume reaches this level you should really feel the endurance improvements.
SESSION	Swim	Bike	Swim & Run	Rest	Strength & Run	Swim	Brick	
DURATION	3 km	35 km	2.5 km/7.5 km		60 min/7.5 km	2 km	30 km/5 km	Focus on your ability to hold higher efforts for longer
INTENSITY	Drills/Intervals	Hills	Steady		Track	OWS/Tempo	Mixed effort	
SESSION DETAILS	Swim: Session #9	Using a hilly route or one with at least one good climb that takes >3 min to ascend. Mix up between seated and standing climbing, keeping rhythm. Get used to descending too.	Swim: Session #7  Run: Steady pace, below threshold: @RPE 6-7		Strength: Program 2b  Run: Session #3  Sets of the same distance should be repeated at the same speed/time. So consider this when you set off.	Swim: Second OW swim of the program, continue with Practice sighting, and adapting your stroke to a wetsuit and open water; Slow your cadence and working with the buoyancy of the suit. Break your swim down into some time spent adapting then finish with a 4-500 m hard effort. @RPE 7	Option 1: Split into two mini-bricks of 15k/2.5k and do twice through, for more transition practice and more speed work  Option 2: Complete through once at race pace.	Use hills sessions to focus on power and control  Keep improving open water skills & confidence  Throw in a quick transition practice after your OWS; getting wetsuit off asap while still moving, running after a swim.
KEY FOCUS	Pace control and being able to repeat pace of each set.	Climbing, descending, maintaining rhythm	Focus on run form and posture. Aim to keep 1 km slips as similar as possible.		Hold form, and ensure times are repeated on shorter sets.	Open water adaptation & skills	Set at race pace. Running well off the bike.	<b>WEEKLY DISTANCE: 92.5 KM</b>
NOTES	While aiming to swim hard on the shorter efforts, also try to maintain good alignments and form in the water since losing technique will make you slower.	If you've not a hilly route you can do plan a 5-8 km loop around 1 particular hill and rep around that.	Ensure you're hydrated and perhaps practice with any energy products you're planning to use on race day.		The longer set should be closer to your goal race pace. The shorter sets should be faster.	Focus on controlling your breathing as this is often first to go open water as it's colder.	Experiment with different positions on the bike; hoods, drops etc., aiming to be more 'aero' where it counts.	

Week 12								GOALS
DAY	MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY	SATURDAY	SUNDAY	This is your second largest volume week, so ensure you allow sufficient fuelling and recovery/sleep.
<b>SESSION</b>	<b>Swim</b>	<b>Bike</b>	<b>Strength &amp; Run</b>	<b>Rest</b>	<b>Strength &amp; Run</b>	<b>Swim</b>	<b>Bike</b>	
<b>DURATION</b>	3 km	40 km	60 min/7.5 km		60 min/5 km	2 km	80 km	
<b>INTENSITY</b>	Drills/Intervals	Intervals	Negative		Track	Open Water	Hills	The more familiar session in the program should be seeing noticeable improvements. If you're happy to do so you can tweak sessions e.g. swims to work on weaker areas like drills or sprints.
<b>SESSION DETAILS</b>	Swim: Session #10	5 x 5 intervals:  10 min warm up @RPE 5  5 min @RPE 6 5 min @RPE 8-9  Repeat until 3-5 km to go then warm down @RPE 4-5  Outdoors: Plan a route where you can complete a similar workout; e.g. loops or out-and-back.	Strength: Program 2a  Run: @RPE 6-9  Break this run down into 3 x 2.5 km efforts, planning to run each block at the following intensity: 1 – RPE 6 2 – RPE 8 3 – RPE 9		Strength: Program 2b  Run: Session #1	Continue to work on swim prep; wetsuit fit, warming up dry-side, getting acclimatised quickly, and warming up within a couple of minutes, as this is what you will have on race day.  Work in some harder efforts in to the later part of the session.	Steady state ride with some efforts and/or hills included. Maintain steady cadence and rhythm to keep a constant work rate on climbs and flat.  If you have access to your race course, you could do a recon ride (2 laps).	
<b>KEY FOCUS</b>	Body position, rotation through the hips	High intensity efforts & recovery	Pace judgement & finishing strong		Match or better time from the last time you did this track session	Open water skills. Swimming at harder efforts	Maintaining steady RPE 6-8	<b>WEEKLY DISTANCE: 137.5 KM</b>
<b>NOTES</b>	Your kicking should be already feeling better, but still keep body position in mind and legs high in the water. Think about rotation through the hips & forearm position on catch.	This may be performed on a turbo or outside, whichever is convenient	Working at RPE 9 towards the end of a run will feel very tough, but will be good practice for race day, as well as mental prep for working hard.		The strength program should be getting easier and you should be increasing your weights/times of each exercise.	1 arm drills aid rotation & stroke efficiency are good focus point for open water adaptation.	Being able to ride your race route give you more confidence on descents & corners. You can also pace judge climbs and look for prevailing wind direction etc.	

WEEK 13								GOALS
DAY	MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY	SATURDAY	SUNDAY	The next two weeks are high volume training weeks, time wise. Ensure you plan in adequate rest and nutrition to prepare for sessions.
SESSION	Swim	Bike	Swim & Run	Rest	Strength & Run	Swim	Brick	
DURATION	3 km	50 km	3 km/12.5 km		60 min/7.5 km	2 km	40 km/7.5 km	
INTENSITY	Drills/Intervals	Mixed effort	Intervals/neg. split		Track	Open water	Bike/Run	This is a high volume week for running and your last tough one before you begin to taper down.
SESSION DETAILS	Swim: Session #9	Preferably outdoors ride on a naturally varied route. Add in some harder "fartlek" style efforts. Pick a route where you can practice longer aerobar/drop efforts to work hard in a lower position	Swim: Session #10  Run: Complete this run as a negative split, but keeping intensity moderate:  @RPE 5-7		Strength: program 2a  Run: Session #2	Longer steady duration swimming, run through wetsuit fitting, lubricant, and use your tri-suit underneath. Practice your sighting and start to play around with speed work.  If you can swim with a friend or in a group, it is good practice for race day conditions	Race simulation: Using your intended race kit, clothing etc.  Bike: warm up over the first couple of km then build into RPE 8+  Run: Run strong off the bike for the first 2 km then settle into an easier pace.	Speed work and pacing is key  Start to think about how much fluid you're using in training as a predictor of what you'll need on race day.  If you've got any new shoes for race day, start to wear them in now,
KEY FOCUS	Holding form over longer distance. Using paddle work to strengthen stroke	Simulating holding a pace in a race with shorter higher efforts like hills/overtaking	Swim: Test yourself on the last 400m to see how well you perform tired.		Speed work and pushing into peak fitness	Swimming an accurate course and holding pace in open water	Bike: Race pace effort Run: work hard for 2 km then slow to steady pace.	<b>WEEKLY DISTANCE: 125.5 KM</b>
NOTES	Final fitness push. The hard work you do here will fine tune your race fitness. Use shorter efforts to work hard and longer efforts to refocus on technique.	Take adequate water & fuelling with you.	This is a high volume day, if possible plan the session with a good gap in between. Make sure to eat and drink enough before and after these sessions.	If you haven't already start thinking about recovery massage. With the volume of training you're doing your body will thank you for a little maintenance.	Strength sessions here are now key in keeping your body mobile and working muscles that you'll be relying on.	Even though we want to try and race at a steady pace, mixing up your speed will simulate fatigue or being out of breath and help you learn to cope with it.	Prep you bike as you intend to on race day; bottles, nutrition, spares etc. Field test all your planned equipment and transition strategies.	

Week 14								GOALS
DAY	MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY	SATURDAY	SUNDAY	The last high volume week before we start to bring the distance down.
SESSION	Strength & Swim	Bike	Run	Rest	Strength & Run	Swim & Run	Bike	
DURATION	60 min/3 km	40 km	10 km		60 min/5 km	2 km/7.5 km	80 km	By the end of this week you will have a good idea of your race plan and be able to set a realistic target and plans your pacing and nutrition strategy around this.
INTENSITY	Drills/Intervals	Intervals	Intervals/Steady		Track	OW/Threshold	Hills	
SESSION DETAILS	<p>Strength: Program 2a</p> <p>Swim: Session #10</p>	<p>Indoors: 5 km Warm up, progressing intensity. @RPE 5-8</p> <p>1 min @RPE 5 6 min @RPE 6 1 min @RPE 7 1 min @RPE 8 1 min @RPE 9</p> <p>Repeat until 3-5 km to go, then cool down @RPE 4</p> <p>Outdoors: Fartlek ride with longer efforts</p>	<p>Run: @RPE 6-7</p> <p>Steady effort, keep it aerobic and run over a route of your choosing. If you're off-road or on a hilly route, pace yourself to keep effort in the correct zone.</p>		<p>Strength: Program 2b</p> <p>Run: Session #1</p>	<p>Swim: Run through a prep as if race day; get your suit on in plenty of time, fit it properly. Warm up on land, then get in and acclimatise and warm up within 2 similar minutes (what you'll have on race day) then do a practice start and swim race distance. Use remaining distance for sprints.</p> <p>Run: @RPE 8</p>	<p>Steady state ride with some hills included. Maintain steady cadence and rhythm. Pace judgement on hills.</p>	<p>Make sure you have all the equipment you need, and any last minute purchases are tested in training over race distance at least.</p>
KEY FOCUS	Swim: Test yourself on the last 400m to see how well you perform tired.	Holding threshold pace for longer	Focus on run form, posture and finishing feeling strong.		Working above race pace	Swim: Working at race pace. Run; race pace for ¾ distance	Pace judgement on hills	
NOTES	You should be getting near your best times over 100 & 200 m, but the real show of fitness, will come when you are able to them return to the longer 400's and hold a good pace.,.	Being able to work above and below your threshold/race pace and then return to working there is a useful skill for racing on courses with challenging terrain or technical segments.	Steady effort at a below max pace, focusing on holding form and keeping each km the same effort level or HR.		If you like you can do each segment of the same distance as a negative split, trying to beat the time of the last segment by 1-2 seconds.	Final race pace prep. Polishing off you technique and race pacing.	Good pacing on hills is important to maintain optimal race pace, too easy and you lose time, to hard and you'll be slower on the flats.	

WEEK 15								GOALS
DAY	MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY	SATURDAY	SUNDAY	Bringing the volume down and working on speed will let your body start to recover while acting as a last surge for your peak fitness
SESSION	Swim	Bike	Swim & Run	Rest	Strength & Run	Swim	Brick	
DURATION	3 km	30 km	2.5 km/5 km		60 min/4 km	2 km	25 km/7.5 km	Everything should be aimed at setting up your race plan.
INTENSITY	Drill/Interval	TT	Intervals/Track		Tempo	Open water		
SESSION DETAILS	Swim: Session #9	Preferably outside on a route you know well and can ride hard safely. Aim to complete the ride at race intensity. RPE 7-8  If weather allows, use race kit as well: Shoes, socks/sockless? Trisuit Sunglasses	Swim: Session #8  Run: Session #1		Strength: Your program choice Which even program you feel is more effective for you. Keep the weights/repetition the same but only complete around 2/3 of the total sets. Allocate more time to flexibility and foam rolling  Run: Steady pace @RPE 8+	If you like you can do this session as a straight 1 km swim TT. Otherwise break it up into shorter/faster efforts. Where ever you feel you stand to gain the most, based on how your training has gone.  If swimming with a group, practice starts, drafting & turning buoys in close proximity	Race day simulation: Use all your kit and practice how you'll lay it out come race day. Bike & Run @RPE 7-8 working on your pacing and trying to settle into your run as soon as you can off the bike. Work on transition time	NB; All plans need to be flexible, this is a critical stage in training and if you feel over fatigued you must rest, as this will prepare you better than overtraining
KEY FOCUS	Maintaining stroke count per length when working hard	Sustained race pace	Speed, pacing, consistency		Flexibility, Run; Hard from the start effort @race pace	Distance, breathing, sighting, pace.	Transition speed, pacing	<b>WEEKLY DISTANCE: 82.5 KM</b>
NOTES	A good sign that you're holding your efficiency is that you're stroke count per length stays the same.	keep hydrated and note your intake, practice nutrition strategy	Use the shorter sets to really push out your maximum sustained efforts over each distance.		Keeping your muscles working, but more importantly keeping them mobile and recovering will be important for being at your best on day	Make sure your warm up routine is in place, so you can be ready to work at race pace from the gun.	Everyone lays out transition slightly differently. Find what works for you and practice it; e.g. race belt, elastic laces, nutrition	

WEEK 16 – Race Week								GOALS	
DAY	MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY	SATURDAY	SUNDAY	<p>The hard work is done, nothing you can do now will make you fitter. So the focus here is to maintain your peak while allowing recovery.</p> <p>Keep the sessions high quality with good pace work</p> <p>Reduced volume/distance will allow for adaptation/recovery</p> <p>If you've travelled to an event having a run or swim when you get there can help you get over a journey</p>	
<b>SESSION</b>	<b>Swim</b>	<b>Bike</b>	<b>Run</b>	<b>Strength</b>	<b>Run</b>	<b>Swim</b>	<b>RACE DAY</b>		
<b>DURATION</b>	1.5 km	15 km	2.5 km	30 min	2 km	1 km	1.5/40/10 km		
<b>INTENSITY</b>	Mixed	Mixed efforts	Mixed efforts	Easy	Easy	Easy	Race Pace		
<b>SESSION DETAILS</b>	<p>200 m warm up 200 m pull buoy @RPE 6</p> <p>400 m @RPE 7 200 m @RPE 8 100 m x 2 @RPE 9</p> <p>100 m warm down</p>	<p>Final pre-race check; ride a steady effort bike in race set up, carry what you're planning to carry in the race. Add in some bursts 2-4 minute efforts. RPE 5-8</p>	<p>Run at a steady pace focusing on your form and keeping a light foot strike. Add in shorts burst of harder efforts for a little bit at a time. RPE 6-8</p>	<p>Just do the WARM-UP/flexibility part of your routine ONLY.</p> <p>If you're feeling good head out for a gentle 1 km run @RPE 5-6 to keep you loose (optional)</p>	<p>Still warming up beforehand this should be about keeping your legs moving. Still working at a good tempo, but not quite race pace. RPE 7</p>	<p>Relaxed effort swim, loosening off with a few short bursts.  RPE 5-7</p>	<p>The hard work is over, stick to what you know in training. Race hard, race well and have fun!</p>		
<b>KEY FOCUS</b>	Speed, pacing,	How the bike feels	Run form	Flexibility, recovery	Relaxed form	Good position, technique in the water. Relaxed stroke.			<b>WEEKLY DISTANCE: 73.5 KM</b>
<b>NOTES</b>	<p>With all the training under your belt, you shouldn't feel tired after this session. This is steady work with a few bursts.</p>	<p>This is your pre-race bike check; is all in working order, do you have the spares you need. After the ride, clean the bike and give the tyres a once over.</p>	<p>This distance should feel very easy now and you should feel good when you finish.</p>	<p>If possible book a massage.</p>		<p>Nice short session to loosen off. You could even do this session in open water for a confidence boost and wetsuit removal practice.</p>	<p>Do your best, and have fun!</p>		

# APPENDIX

## Rate of Perceived Exertion

We will use the Rate of Perceived Exertion (RPE) scale illustrated below to determine the intensity of your sessions.

These will be highlighted in each session text to make it clear as to what is expected. This table helps you understand exactly how you should feel when executing the training session. Due to the nature of the scale, it is subjective and requires you to feel how your body is responding to the exercise, when doing this consider how your heart is pumping, how quickly you are breathing, how much you are sweating and how much discomfort you are experiencing in your legs.

Please remember that everybody's RPE figure could be different to yours when exercising at the same speed because we all respond differently to exercise.

RPE	DESCRIPTION
0	Complete rest
1	<b>Very Weak:</b> I am just about moving
2	<b>Weak:</b> I am walking at a faster pace and can hold a conversation easily
3	<b>Light:</b> I am beginning to sweat a little, but can hold conversation throughout
4	<b>Moderate:</b> I am very happy at this effort
5	<b>Somewhat Strong:</b> I am sweating more heavily and starting to feel my breathing is becoming more stressed
6	<b>Strong:</b> I am beginning to feel more out of breath but could maintain this pace for a few hours
7	<b>Very Strong:</b> My breathing is very laboured, but I can still maintain pace for an hour without slowing
8	<b>Hard:</b> I am starting to struggle to hold this pace and my heart is racing and am sweating heavily
9	<b>Very Hard:</b> This is hurting and I can only hold this effort for up to 5mins
10	<b>Extremely Hard:</b> I am absolutely flat out and this is sprinting. I will need to stop after 30secs

## SWIM SESSIONS

SESSION 1 – 1 KM
<p><b>WARM UP</b></p> <p>100 m – FS RPE 4-5 200 m Drill (25m fist/25m FS x 4)</p>
<p><b>MAIN SET</b></p> <p>2 x 200 m FS + Pull buoy @RPE 5 2 x 100 m FS @RPE 7</p>
<p><b>COOL DOWN</b></p> <p>100 m – FS RPE 4-5</p>

SESSION 2 – 1.5 KM
<p><b>WARM UP</b></p> <p>200 m – FS RPE 4-5 200 m Drill (25m fist/25m FS x 4)</p>
<p><b>MAIN SET</b></p> <p>1 x 400 m FS + Pull buoy @RPE 5 2 x 200 m FS @RPE 6 2 x 100 m FS @RPE 7</p>
<p><b>COOL DOWN</b></p> <p>100 m – FS RPE 4-5</p>

SESSION 3 – 1.5 KM
<p><b>WARM UP</b></p> <p>200 m FS @RPE 4-5 200 m Drill (50m Drill/50m FS x 2) (Drill can be; Kickboard/catch-up/1-arm)</p>
<p><b>MAIN SET</b></p> <p>1 x 300 m FS + Pull buoy @RPE 6 2 x 150 m FS @RPE 7 4 x 75 m FS @RPE 7-8</p>
<p><b>COOL DOWN</b></p> <p>200 m – FS RPE 4-5</p>

SESSION 4 – 2 KM
<p><b>WARM UP</b></p> <p>400 m FS @RPE 5 400 m FS + Pull @RPE 5-6</p>
<p><b>MAIN SET</b></p> <p>200 m FS @RPE 6 100 m FS @RPE 7 50 m FS @RPE 8</p>
<p><b>COOL DOWN</b></p> <p>150 m – any stroke RPE 4-5</p>

SESSION 5 – 2 KM
<p><b>WARM UP</b></p> <p>200 m FS @RPE 5 300 m Drill (25m 1-arm FS/25m 1-arm FS/50m FS x 3)</p>
<p><b>MAIN SET</b></p> <p>400 m FS @RPE 5-6 200 m FS + Paddle + Pull buoy @RPE 6 4 x 200 m FS @RPE 7-8 (30 sec rest)</p>
<p><b>COOL DOWN</b></p> <p>100 m – any stroke RPE 4-5</p>

SESSION 6 – 2 KM
<p><b>WARM UP</b></p> <p>400 m FS @RPE 5 100 m Kicking w/kickboard</p>
<p><b>MAIN SET</b></p> <p>400 m FS + Pull buoy @RPE 5-6 200 m FS @RPE 6-7 2 x 100 FS @RPE 8</p>
<p><b>COOL DOWN</b></p> <p>100 m – any stroke RPE 4-5</p>

## SWIM SESSIONS

### SESSION 7 – 2.5 KM

#### WARM UP

200 m FS @RPE 5  
200 m Drill (25m fist drill/25m FS x 4)

#### MAIN SET – Repeat twice through

1 x 400 m FS @RPE 5-6  
2 x 200 m FS + Paddles @RPE 6-7  
2 x 100 m FS @RPE 8

#### COOL DOWN

100 m – any stroke RPE 4-5

### SESSION 8 – 2.5 KM

#### WARM UP

400 m FS @RPE 5  
400 m Drill (50m kick/50m FS x 4)  
200 m FS + Pull buoy @RPE 6

#### MAIN SET – repeat twice through

400 m FS @RPE 6  
200 m FS @RPE 7-8  
100 m Mixed stroke @RPE 5-6

#### COOL DOWN

100 m – FS RPE 4-5

### SESSION 9 – 3 KM

#### WARM UP

400 m FS @RPE 5+  
100 m Kickboard  
100 m FS + Pull buoy @RPE 6

#### MAIN SET – repeat three times through

1 x 200 m FS @RPE 6  
2 x 100 m FS @RPE 7 (paddle + pull optional)  
4 x 50 m FS @RPE 8+

#### COOL DOWN

100 m – any stroke RPE 4-5

### SESSION 10 – 3 KM

#### WARM UP

400 m warm up FS @RPE 5  
100 m Kicking

#### MAIN SET

1 x 400 m FS @RPE 6 (45 sec rest)  
2 x 200 m FS Paddle + Pull buoy @RPE 7 (30 sec rest)  
4 x 100 m FS @RPE 8 (20 sec rest)  
2 x 200 m FS + Paddle + Pull buoy @RPE 7 (30 sec rest)  
1 x 400 m FS @RPE 6 (45 sec rest)  
2 x 200 m Medley (if you cannot do fly, replace with FS)

#### COOL DOWN

100 m – any stroke RPE 4-5

## Explanation of swim drills

*Included within the swim sessions are a number of drills. Please find an explanation of each drill below:*

**KICK:** Swim on your front and using a kickboard you use only your legs to aid propulsion. You must kick from the hips using a straight leg action. Concentrate on pointing your feet behind you and having floppy and flexible ankles. Engage your core to keep your hips elevated. When using the kickboard aim to keep the board horizontal by applying a small amount of pressure down on the board thus raising your chest. You can either keep your head up or pop your face into the water to simulate the correct body position. You can use fins to help with your kick if necessary.

**SIDE KICK:** Hold the kickboard in one hand and keep that hand outstretched in front of your head and body, your other arm will rest on your side. Kick from the hips with the hips facing the sides of the pool. Concentrate on pointing your feet towards the end of the pool with floppy and flexible ankles. Engage your core to keep your hips elevated. You should keep your face pointing down to the bottom of the pool only turning your head sideways to breathe. You can use fins to help with your kick if necessary.

**DEAD MAN FLOAT:** Push off the wall keeping your arms in front of the head then when you begin to lose momentum bring your arms back to being by your sides, where they now stay. Use only your kick for propulsion, using fins where necessary. Concentrate on body and head position, keep your head facing down with the chin slightly tucked inwards to your chest and push your chest out down towards the floor. The hips should gently break the surface of the water. If you become stationary, simply do a few arm strokes to gain momentum again.

**PENCIL FLOAT:** Apply the same principles as for the Dead Man Float, except this time you keep your arms fully stretched out in front of the body and have your head squeezed in between your arms. Concentrate on keeping the arms straight and long.

**CATCH-UP:** When swimming a standard Front Crawl, apply a slower arm revolution so that each arm is completing a full stroke before the other arm begins the next stroke. Complete a full stroke with your Right arm, holding your Left arm in a forward and outstretched position, with your Right hand coming through and making contact with your Left hand before you begin a full stroke with the Left arm. Continue to do this resisting the temptation to begin the next stroke too soon. A handy tip is to use a kickboard or pull buoy and hold this in the leading hand and exchange hands between strokes. If you struggle to maintain body position doing this drill hold a pull buoy between your thighs.

**PULL:** Swim standard Front Crawl holding a pull buoy between your thighs. Concentrate on the power needed to complete the full stroke without any kick being applied. You must be strict to not use any kick doing this. Do not speed your stroke up to compensate for the lack of a leg kick.

**ZIPPER:** Swim standard Front Crawl, as your arm is beginning its movement up the body trail your thumb up from the thigh, past the hip and into towards the arm pit before allowing the hand to exit the water and reach forwards. This encourages a high elbow exit from the water as well as keeping your recovery arm in close proximity to the body.

**PADDLES:** Wear hand paddles to apply greater resistance to the water through each stroke. This promotes greater strength through your arms and shoulders. To use paddles properly ensure that you have the correct size paddle for your hand, then when using you must enter the water with the fingers pointing down to the bottom of the pool and pull through the water with your elbow always higher than your hand. Continue to push all of the way through the stroke past your hip to get full use of the paddle.

**POLO-SIGHTING:** Introduce some open water skills to your pool swim with this drill. When turning your head to breathe also turn your head forwards to look in front of you. When trying to look forwards activate a strong stroke that will allow you to bring your shoulders higher out of the water. Do not do this every breath, start with every 4 breathes and work up to every 8. Find the sighting/breathing pattern that works best for you.

**HYPOXIC BREATHING:** Swim standard Front Crawl and concentrate on the number of strokes per breath. Begin with your normal breathing pattern and then gradually try to increase by 1 stroke at a time, building to a maximum of 7 strokes per breath. You must relax completely to be able to execute this drill, relax your chest, neck and jaw and focus on a very slow exhalation. Alternate between breathing patterns to simulate the unpredictability of open water swimming.

**FIST DRILL:** Close your hands like fists and swim normal front crawl. This takes away the paddle action of your hand and you will need to concentrate on the position of your forearm to be used to pull you through the water.

## Running – Track Sessions

SESSION 1	SESSION 2	SESSION 3
<b>Warm Up</b>	<b>Warm Up</b>	<b>Warm Up</b>
400m at RPE 4-5	400m at RPE 4-5	400m at RPE 4-5
<b>Main Set*</b>	<b>Main Set*</b>	<b>Main Set*</b>
1 x 1600m	3 x 1600m	1 x 1200m
2 x 800m	3 x 800m	3 x 400m
4 x 400m		1 x 1200m
		3 x 400m
		1 x 1200m
		3 x 400m
<b>Total 5200m</b>	<b>Total 7600m</b>	<b>Total 7600m</b>

\*You should aim to run your main set as fast as you can, however the pace you set should be consistent for all of your 400m efforts for example in Session 1 the 400m pace during your 1600m effort should be the same as your final 400m effort. If you start out too fast your 400m times will start slipping. Find a pace you can maintain then gradually chip away at your 400m time gradually.

## Strength & Conditioning Session 1A

Warm Up						
Flexibility/Movement	Duration	Notes				
Foam roller; Back	30-45 sec	Roll over back, especially lower, to ease off connective tissue & increase mobility				
Foam roller; ITB	30-45 sec	Roll ITBs to release tension in connective tissue that may inhibit knee/hip movement				
Foam roller; Calf's	30-45 sec	Rolling calf's, especially Achilles, can aid ankle flexibility and recovery from training				
Kneeling hip flexor stretch	30-45 sec	Gently driving hips into stretch, with arms overhead to feel stretch in hips & torso				
Hamstring 'track stretch'	8-10 reps	From "start" position to semi-standing while holding foot, until stretch it felt, in hamstring				
Main Set						
Exercise	Sets	Reps	Tempo	Rest	Weight	
Side plank; from knees	2-3es	45sec	static	20sec	BW	
Front plank on stability ball (knees or toes)	2-3	16-20	Slow	20sec	BW	
Tube walking	2	20	Slow	20sec	RB	
2 leg glute press w/foot on step	2-3	12-15	Slow	30sec	BW	
Stability ball wall squat	2-3	12-15	Slow	30sec	BW	
Laying over stability ball, arm raise	2-3	12-15	Slow	30sec	BW	
Kneeling press up	2-3	Max	Slow	30sec	BW	

## Strength & Conditioning Session 1B

Warm Up						
Flexibility/Movement	Duration	Notes				
Foam roller; Back	30-45 sec	roll over back, especially lower, to ease off connective tissue & increase mobility				
Foam roller; ITB	30-45 sec	Roll ITBs to release tension in connective tissue that may inhibit knee/hip movement				
Foam roller; Calf's	30-45 sec	Rolling calf's, especially Achilles, can aid ankle flexibility and recovery from training				
Kneeling hip flexor stretch	30-45 sec	gently driving hips into stretch, with arms overhead to feel stretch in hips & torso				
Hamstring 'track stretch'	8-10 reps	from "start" position to semi-standing while holding foot, until stretch it felt, in hamstring				
Main Set						
Exercise	Sets	Reps	Tempo	Rest	Weight	
Front plank (from toes or knees)	2-3es	45sec	static	20sec	BW	
Dead bug	2-3	16-20	Slow	20sec	BW	
Laying on side leg raise	2	20	Slow	20sec	RB	
Hamstring curl on stability ball	2-3	8-10	Slow	30sec	BW	
Lateral lunge, alternating sides	2-3	20	Slow	30sec	BW	
Resistance band pull over on stability ball	2-3	12-15	Slow	30sec	BW	
Stability ball chest press	2-3	Max	Slow	30sec	BW	

## Strength & Conditioning Session 2A

Warm Up						
Flexibility/Movement	Duration	Notes				
Foam roller; Back	30-45 sec	Roll over back, especially lower, to ease off connective tissue & increase mobility				
Foam roller; ITB	30-45 sec	Roll ITBs to release tension in connective tissue that may inhibit knee/hip movement				
Foam roller; Calf's	30-45 sec	Rolling calf's, especially Achilles, can aid ankle flexibility and recovery from training				
Kneeling hip flexor stretch	30-45 sec	Gently driving hips into stretch, with arms overhead to feel stretch in hips & torso				
Hamstring 'track stretch'	8-10 reps	From "start" position to semi-standing while holding foot, until stretch it felt, in hamstring				
Main Set						
Exercise	Sets	Reps	Tempo	Rest	Weight	
Side plank from toes	2-3es	45sec	static	20sec	BW	
Stability ball roll outs from knees	2-3	16-20	Slow	20sec	BW	
Tube walking	2	20	Slow	20sec	RB	
1 leg glute press w/foot on step	2-3	12-15	Slow	30sec	BW	
Split squat (with weights if too easy)	2-3	12-15	Slow	30sec	BW	
Laying over stability ball; dumbbell row	2-3	12-15	Slow	30sec	BW	
Kneeling press up	2-3	Max	Slow	30sec	BW	

## Strength & Conditioning Session 2B

Warm Up						
Flexibility/Movement	Duration	Notes				
Foam roller; Back	30-45 sec	Roll over back, especially lower, to ease off connective tissue & increase mobility				
Foam roller; ITB	30-45 sec	Roll ITBs to release tension in connective tissue that may inhibit knee/hip movement				
Foam roller; Calf's	30-45 sec	Rolling calf's, especially Achilles, can aid ankle flexibility and recovery from training				
Kneeling hip flexor stretch	30-45 sec	Gently driving hips into stretch, with arms overhead to feel stretch in hips & torso				
Hamstring 'track stretch'	8-10 reps	From "start" position to semi-standing while holding foot, until stretch it felt, in hamstring				
Main Set						
Exercise	Sets	Reps	Tempo	Rest	Weight	
Front plank (from toes or knees)	2-3es	45sec	static	20sec	BW	
Dead bug	2-3	16-20	Slow	20sec	BW	
Laying on side leg raise	2	20	Slow	20sec	RB	
Walking lunges	2-3	20	dynamic	30sec	BW	
Lateral lunge to balance	2-3	12-15	Slow	30sec	BW	
Resistance band pull over on stability ball	2-3	12-15	Slow	30sec	BW	
Stability ball chest press	2-3	Max	Slow	30sec	BW
